## DOVER LIGHTING DESIGN STRATEGY

## DOVER LIGHTING DESIGN STRATEGY

Working with Rummey Design Associates, Urban Projects produced a lighting Design Strategy for Dover as an element of a new Public Realm Strategy.

Dover has suffered economic decline and urban decay but new initiatives pioneered by Dover District Council in partnership with Kent County Council are seeking to reverse the decline in the town's economy and built fabric. The BBC have reported on these initiatives and a new organisation called Dover Pride has been established to promote Dover's Renaissance

## Key facts and information

At the heart of the strategy is an in-depth analysis of the town's economic, social and historic structures. by understanding how the town works and what it aspires to we are able to recommend progressive change to help in the regeneration of the town. Following the Strategy a number of trial lighting schemes were undertaken. These help to raise the profile of lighting and have been instrumental in kick starting regeneration projects. These trial Schemes have now been implemented by Urban Projects.
