GRAVESEND LIGHTING DESIGN STRATEGY

GRAVESEND LIGHTING DESIGN STRATEGY

Urban Projects has published a lighting strategy for Gravesend and over the last three years have been implementing a series of projects. Our strategy formed the basis of a funding application to central government for urban improvement funds.

Key facts and information

Our strategy included building partnership lighting with shopkeepers and business owners in the high street as well as the illumination of civic buildings and spaces such as, The Old Town Hall and Town Pier Square as well as the development of bespoke pavement lighting pictured above.

The Pavement lighting uses LED's as a source of illumination and features handmade recycled glass lenses.
